

## **DODONI S.A. Awarded Bronze Prize at BITE Awards for the Digital Transformation of its Operational Model with Galaxy ERP**

As part of the BITE Awards, DODONI was awarded the Bronze prize in the category “**Large-Scale Information Technology Projects**”. This award recognized the company’s dedicated efforts in the digital sector, **focusing on the Digital Transformation of its Operational Model** with the assistance of Galaxy ERP.

This particular award highlights the significant role played by digital transformation through the integration of Galaxy ERP into the company's business processes. The use of this innovative solution has greatly contributed to enhancing productivity, serving customers with precision and speed, and effectively managing its business operations.

Galaxy ERP allows DODONI to upgrade its business processes in their entirety, unify the management of its corporate structures, simplify internal procedures, and provide real-time information about its operations.

Furthermore, the quantitative improvements include reduced administrative time, faster completion of warehouse tasks, minimization of batch product tracing time, quicker order processing, and the possibility to extend and improve the use of ERP.

Galaxy ERP marks a new era for DODONI as the company steadily continues to focus on its growth.

For 60 years now, DODONI has demonstrated its dedication to producing high-quality Greek dairy products, showcasing Greek heritage and expanding its exports to over 50 countries across the globe.
