

PRESS RELEASE

DODONI Cyprus holds volunteer blood drive

The blood drive took place at the Limassol plant in Cyprus in memory of Andreas Hatzikostas

As part of its social contribution actions and in continuation of DODONI Greece activities, DODONI Cyprus held its now-established volunteer blood drive at its plant in Limassol on Friday 27 November 2020.

The campaign was a great success as it was dedicated to the memory of Andreas Hatzikostas, son of DODONI Cyprus President Panikos Hatzikostas, who perished in a car accident 23 years ago at the age of 17.

Consistently supporting sensitive social groups and important actions in all countries where it operates, the DODONI family holds a volunteer blood drive 2-3 times a year through an expanded corporate responsibility programme in cooperation with the employees' union and under the auspices of management. It also maintains a blood bank, demonstrating that interest in offering assistance to fellow citizens remains strong and unchanging over time.

Mr Hatzikostas, president of DODONI Cyprus, said: *“We are particularly pleased to once again sponsor the now-established blood drive at our plant and we are truly proud of our staff, who very generously donated a little of their blood and their time to contribute to such an important cause, which can really save lives.”*
