PRESS RELEASE

**Delicious and easy recipes for everyone by DODONI**

*Users have the opportunity to discover over 250 recipes, available at  
<https://www.dodoni.eu/en>*

Having more than 250 unique recipes, ideal for every meal of the day, DODONI dairy encourages the public to visit its website, discover them and find some cooking inspiration!

The company intends to put an end to the everlasting question “What should I cook today?” by continually investing in the creation of new recipes featuring DODONI dairy products. As a result, the website offers a wide range of recipes made using simple, everyday ingredients, many of which are accompanied by short videos that present a step-by-step preparation of the dishes.

Well-known chefs and food bloggers such as Christoforos Peskias, Stavros Varthalitis, Madame Ginger, paxxi, Gabriel Nikolaidis and others, have enriched the website’s recipe collection, creating and suggesting their own delicious ideas for every meal of the day, using DODONI dairy products as main ingredients, such as the famous PDO DODONI Feta cheese, the DODONI Strained Yoghurt, the DODONI cow butter, and many more.

With respect to authentic flavour, high-quality raw ingredients, and simplicity of preparation, DODONI’s original and creative content aims to emphasize Greek delicacies and the Mediterranean diet to both Greeks and foreign customers.

DODONI’s Marketing Manager, Vicky Papoutsaki, stated: “Our goal at DODONI was not to create another recipe website, but to be able to make a digital book of delicious and unique recipes accessible to the public. We invest steadily in the enrichment of this specific category of our website, creating a reference point that integrates our brand and DODONI goods even more deeply into the daily life and in the preferences of both Greeks and international consumers, who have honoured us with their support for more than half a century.”
