**PRESS RELEASE**

**“Superior Taste Award” for DODONI Feta and Yoghurt**

*Three stars for DODONI Feta and DODONI Strained Yoghurt 2% from the International Taste and Quality Institute (iTQi)*

**DODONI FETA and DODONI Strained Yoghurt 2% received the Superior Taste Award 2015** and the highest distinction of three stars in this year’s evaluation of **Superior Taste Awards Institution**. The two products distinguished themselves for their superior quality, high nutritional value and exquisite taste.

The Superior Taste Awards are organised by the International Taste and Quality Institute (iTQi), with the aim of showcasing superior-taste food and beverage products from all over the world. The 120 judges are prestigious chefs and sommeliers, selected within the 16 most prestigious European culinary and sommeliers associations, such as the Hellenic Chefs' Association, Maîtres Cuisiniers de France and others.

For DODONI, these Awards represent a significant recognition by leading culinary professionals, as they were the result of a thorough evaluation of the quality and taste of a wide sample of products, based on a combination of various tasting criteria and a fully unbiased “blind tasting” procedure.

All DODONI products are produced by 100% Greek milk at the Company’s plant in Ioannina, with respect to consumers and to their requirement for natural, pure dairy products that combine high quality and unique taste.

**DODONI’s CEO Tom Seepers** made the following statement: *“We are very proud to have won these awards by the iTQi, which we see as a further sign of the international recognition that DODONI produces the highest quality products with a superior taste. At DODONI we have a longstanding tradition and focus on quality, using the purest and highest quality ingredients, using 100% Greek milk in our products, and providing the experience of authentic taste. DODONI FETA is Greece’s leading feta and we are pleased that now also our yoghurt is gaining the international recognition that we believe it deserves.”*
