

Press Release

**Positive financial results for DODONI in 2013**

*The management change in the Greek dairy producer has already showed the first positive results*

Today, June 19, DODONI S.A. held the Annual Shareholders' General Meeting, in order to communicate the financial results for 2013.

In 2013, the company succeeded in stopping the downward sales trend of the past four years and recorded an income of 83.1 million euro. In the past year, several programs were initiated for improving efficiency, which contributed to strengthening the gross profit margin, from 15.4% to 18.1%, while profits before taxes went up, from 0.5 million euro in 2012 to 1.2 million euro in 2013.

The CEO and Executive member of the DODONI Board of Directors, Mr. Tom Seepers, noted: «Following the change in the company's management in 2012, the new management has implemented a series of initiatives, aiming at improving DODONI'S competitiveness.

*We are very pleased that these moves are starting to bear fruit and we expect that our company and all interested parties and shareholders will benefit in the next years from the positive results. The Company is implementing various investment programs and the owners of the majority, SI Capital Partners «SI CP», are very pleased with their investment in DODONI, since, despite the ongoing difficulties in the Greek market, they already see the first signs of improvement in the overall business environment in the country and they remain certain that DODONI has a further development potential. The shareholders are currently discussing the Company's further development, including –if deemed necessary- a possible increase of the share capital for supporting the Company's investments”.*

Sincerely,  
Ioannis A. Keisoglou  
Spokesman
