Press Release

**3 awards for DODONI in 2016 Greek Export Awards**

DODONI, the leading dairy company of Epirus was distinguished with the gold award in the category "Top Export Company Brand" and two silver awards in the categories "Top Greek Export Company" and "Top Branded Export Product" in 2016 Greek Export Awards, in which a total of 30 companies from various sectors participated.

These distinctions are the result of the ongoing strategic plan implemented by the company in order to upgrade the Greek brand DODONI both in Greece and abroad. They also confirm the Company's significant export activity for over 30 years, as an undoubtedly proud ambassador of Greek cuisine and nutrition in 42 countries, in all 5 continents, where the pure DODONI dairy products travel on a daily basis. All these years, DODONI products have managed to earn their own unique position on the tables and preferences of international consumers thanks to their excellent quality, high nutritional value, rich taste and purely Greek character.

**The Exports Director of DODONI SA, Vasilis Vrochidis** stated: "It is a great honor and pleasure for all of us in DODONI, to be distinguished with three awards in this year's Greek Export Awards ceremony as one of the leading exporting companies in Greece. We are especially proud for exporting the branded Greek DODONI products in 42 countries all around the world, being ambassadors of the Greek original taste and we commit to continue offering our beloved DODONI products worldwide, carrying this way values that are inextricably linked to them, such as tradition, quality, purity, passion, responsibility and authentic Greek taste."

The Greek Export Awards ceremony was held at the Athenaeum InterContinental hotel, attended by more than 300 market executives. The contest was held for 5<sup>th</sup> consecutive year, aiming to award people, ideas and collaborations between the top exporting companies in Greece, highlighting the bright business examples, new technologies and quality upgrade of new generation products that penetrate more effectively in the particularly demanding conditions of International Trade rules.
