Press Release

3 gold stars for DODONI

4 DODONI products received new multi-star distinctions for the second consecutive year

DODONI Dairy Company won for the second consecutive year **4 superior taste awards** by the internationally recognized **Taste and Quality Institute – iTQI** in the framework of **2016 Superior Taste Awards**.

Consistently oriented to producing exceptional quality products with 100% Greek milk supplied from 5,000 small and large farmers, DODONI's dairy products distinguished once again at this year's **Superior Taste Awards**, winning the **highest honor of three golden stars** for the **goat cheese** and **strained yoghurt 8%** and the **respectively high award of two golden stars** for the **gruyere cheese** and "**DODONI Light**".

These new distinctions follow last year's awards of **Dodoni feta** and **strained yoghurt 2%**, two beloved consumers' products, known for their authentic taste and pure quality.

Superior Taste Awards are organized by the International Taste and Quality Institute - iTQi, which aims to highlight worldwide food and beverages of superior quality through an impartial process of **blind tasting by 120 top chefs and sommeliers**.

DODONI's CEO, Mr. Tom Seepers stated: "It is a great honor and pleasure for all of us in DODONI, to actively support our philosophy and be the actual "taste of good", creating products which are distinguished for their excellent quality by Internationally recognized quality institutions, such as iTQi Superior Taste Awards. These new distinctions are a reward and a tangible proof of our constant investment towards the production of superior quality and rich flavor dairy products, exclusively from 100% Greek milk, that stand out for their high nutritional value and have won, apart from international recognition, their own unique place in consumers' tables and hearts both in Greece and abroad".
